The Disc Grinder - The Tool For Truing Up Straight Edges

To ORDER NOW: If you are a stained glass consumer, e-mail your [Wish List](#) to your local retailer or visit your local stained glass store in person. Please search the Retailers List for a store nearest you. If you are a stained glass retailer, please check our [Distributor List](#) for a source near you.

The first efficient diamond disc grinder available on the market. The Disc Grinder was created to save time and aggravation for the artist who regularly needs to make accurate straight edges. Perfect for creating boxes, lampshades, panels and other projects that require consistent straight edges.

- A high-performance 1/9 HP motor rotates the disc at 3650 RPM.
- Durable molded housing.
- Versatile 6" 180 grit diamond disc; the largest available to the hobby market.
- Unique water supply basin.
- Combination splash guard and 15 degree bevel guide
