

# Product Information

## Wizard IV™ Grinder: Stock no. 10030

The Wizard IV™ was designed for the professional glass artist. But, hobbyists looking for "the best" will also enjoy this workhorse machine.

### Key Features:

- Huge, 14 1/2" x 11 1/2" work surface is 16% larger than closest competitor.
- LiftOff™ reservoir makes cleanup fast and easy.
- Reversible work surface saves you money down the road.
- Includes 1" and 1/4" grinding bits.
- [SecondStory™ Work Surface](#) (included) provides an elevated work surface for using the 1/4" bit.
- [Face Shield](#) with wire holder included standard with every machine.
- Accepts all Inland grinder accessories and over 40 grinding bits.
- Convenient Covered Accessory Tray built into reservoir.
- **Five Year Full Confidence [Warranty](#)**

### Product Uses:

- Grind and shape glass using the 1" standard grit bit.
- Drill and enlarge holes using the 1/4" bit.
- Grind intricate curves and details using the 1/4" bit.
- Proper grinding makes your projects fit better.
- Give your work a more professional appearance.
- Work on larger pieces and projects with ease.
- Powerful motor runs 5" discs with power to spare.
- Accepts both the TwinSpin RetroFit Kit and the 3-Step! Beveler Kit.

### Product Specs:

- **Stock no. 10030**

- Work Surface: 14 1/2" wide x 11 1/2" deep
- Construction: High Impact ABS housing
- Voltage: 115V
- Maximum RPM: 3,550
- Maximum Torque: 40 oz-in
- Frequency: 60 Hz
- Maximum Horse Power: 1/9 HP
- Watts Out (Under Load): 183
- Thermal Protection

## Accessory & Replacement Items:

- [TwinSpin™ RetroFitKit™](#): Grind straight edge glass, miter the edges of 3-dimensional projects and improve the fit and appearance of panel lampshades. Shape glass quickly on the outer diameter of the 5" diamond disc. Inland no. 50005
- [3-Step! BevelerKit™](#): Make new bevels, modify stock bevels and clusters, remove light scratches from glass, reclaim old bevels, smooth and polish rough edges and more. Inland no. 50006
- Diamond Grinding Bits: Inland has a wide range of [Standard Bits](#), [Speed Bits](#), [Fine Bits](#) and [Specialty Bits](#) to suit every grinding need.
- [MagnaShield™](#): A clear acrylic face shield with a precision magnifying lens molded in for viewing intricate and small details. Inland no. 50018.
- [GrinderStation™](#): A free standing, three sided washable vinyl surround that helps contain overspray. Inland no. 50014.
- [MagnaLight™](#): A portable, adjustable light with swing-away magnifying lens. Inland no. 76020.
- [MotorShaft Lubricant™](#): A Teflon based lubricant that prevents bits from seizing. Inland no. 50022.
- [DiamondCoolant™](#): Add to the water in your reservoir to decrease friction, increase grinding speed and increase the life of diamond bits. Inland no. 50011.
- [InvisibleSponge™](#): Sponge-less grinder head cooling system for longer bit life and faster grinding.
